

Refrigerated Transporter 2009/10 REFRIGERATED LTL ROUTING GUIDE

REFRIGERATED TRANSPORTER'S *Annual Refrigerated LTL Routing Guide* has been developed as a resource for those who ship less-than-truckload shipments within the US, Canada, and Mexico.

This guide is composed of three sections: LTL Origins, LTL Destinations, and listing of Carriers.

Use the Origins and Destinations segments to determine potential carriers for traffic between specific state pairs. Every carrier with origins in a state is listed under Origins. The same name appearing under Destinations indicates service between those two states.

Once potential carriers have been selected, they can be screened more carefully using the Alphabetical list of Carriers. In this section of the guide, information about service offerings is provided. The listings contain such details as commodities handled, schedules, and cold storage for freight consolidation.

Carriers who begin offering LTL service, or those who missed being listed in this *Annual Refrigerated LTL Routing Guide* should contact *Refrigerated Transporter*. We will happily publish news items announcing new or expanded refrigerated LTL service, and include this information in next year's edition.

LTL ORIGINS Carrier origins are listed by state beginning on this page. A carrier whose name appears in the state of desired origin and in the Destinations list may be able to handle your LTL shipments.
